

SEDIVER

Improve the reliability of your transmission lines:

GO DIGITAL with Sediver Smart'R Suite

Due to increasing constraints, there is a growing need to improve the reliability of existing transmission lines and increase line service rate.

Our **Smart'R Suite solution** allows you to monitor your assets in real-time and give you insights to take preventive actions

- ✓ Real time condition monitoring
- ✓ Real time data transmission
- ✓ Analytical software platform
- ✓ Pollution severity on line analysis with alarms notification

Helping your maintenance team
make data-driven decision
