

THE CHALLENGE

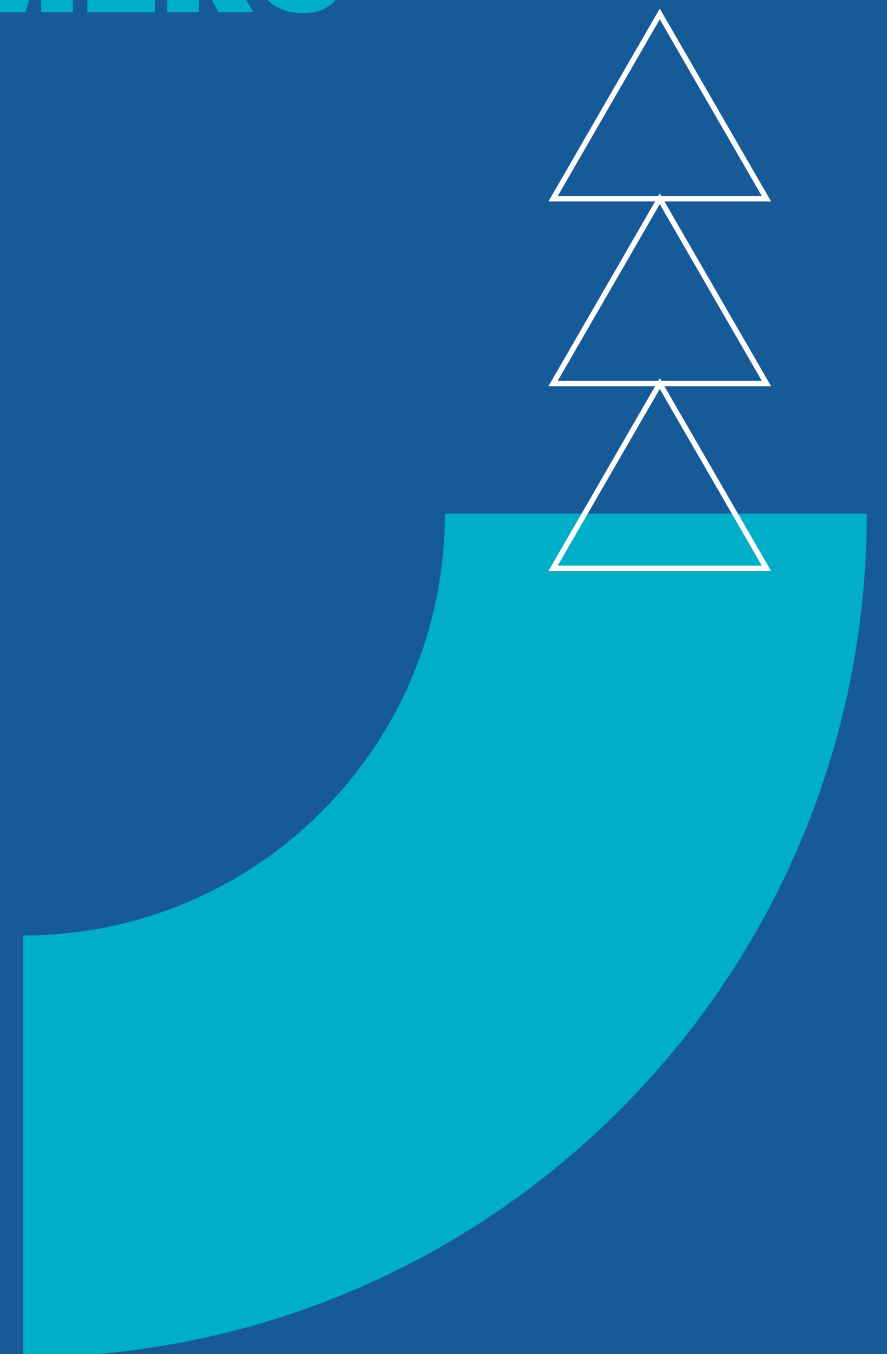

SEEDIVER

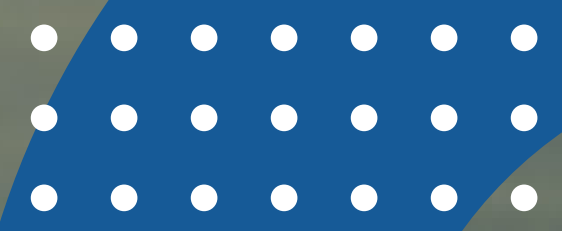

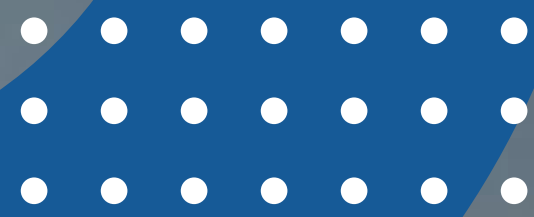

HYDROPOWER PLANTS LOCATED THOUSANDS OF KILOMETERS FROM CONSUMERS

The Rio Madeira, Brazil transmission line carries renewable energy produced by two hydropower plants over a distance of 2,500 km to Sao Paulo. This is the longest HVDC link ever built anywhere, and Brazil's second 600 kV HVDC power link.

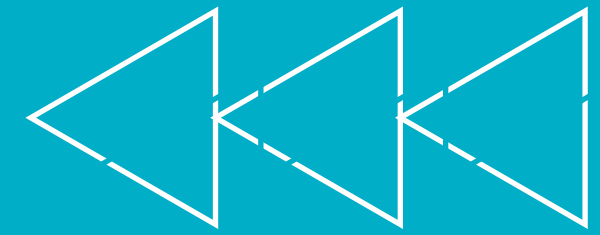

SEDIVER

SEDIVER

SE DIVER

OUR SOLUTION

We delivered reliable long-distance asynchronous networks, minimizing electricity losses with more than **500,000 glass insulators.**

Sediver's proven average shattering rate of less than 0.32 per 10,000 insulator per year has been confirmed by the customer.
