

THE
CHALLENGE

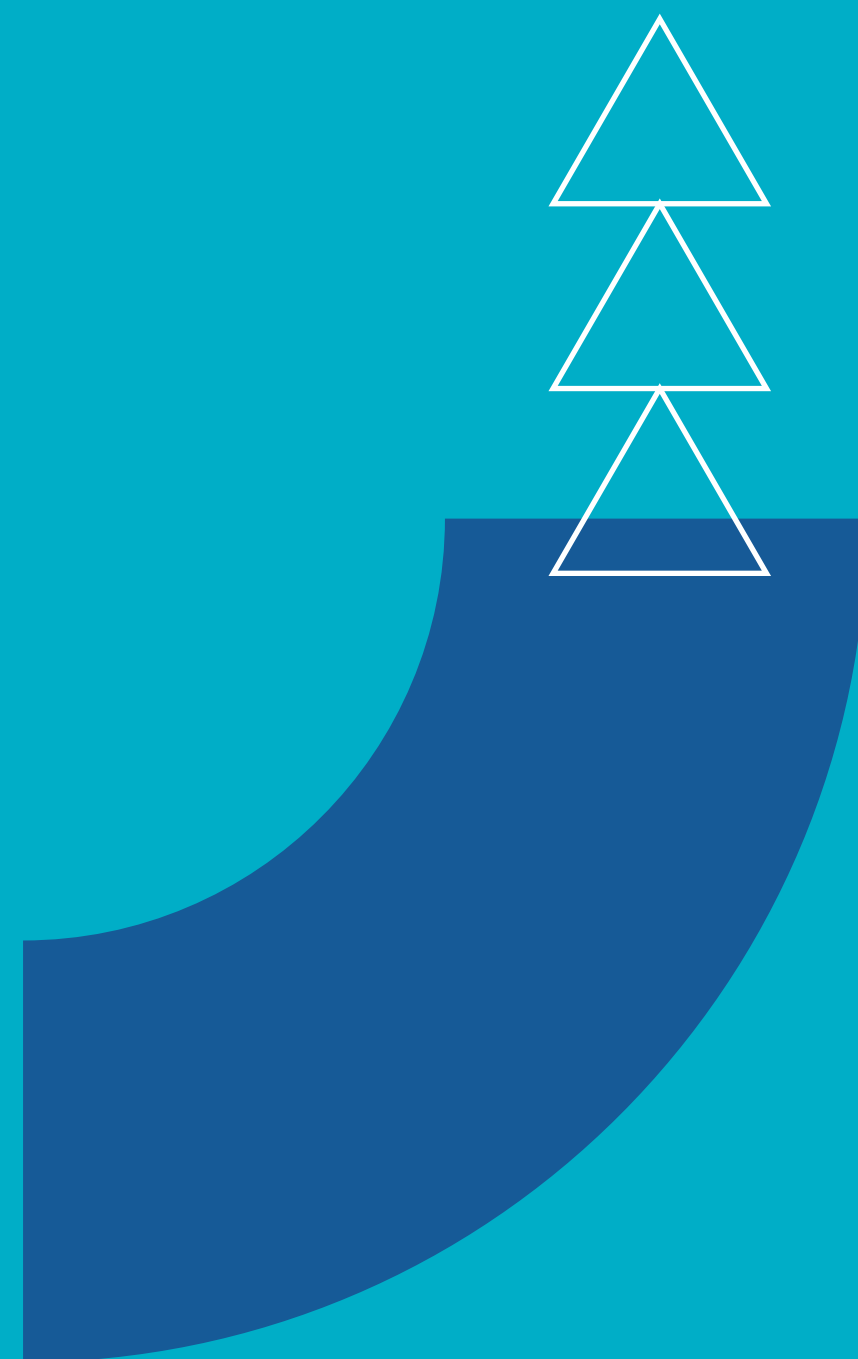

SE DIVER

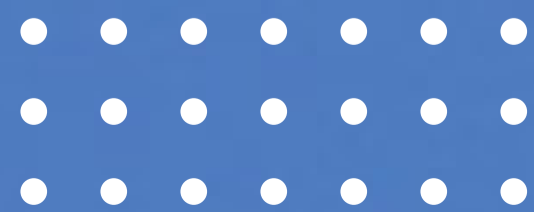

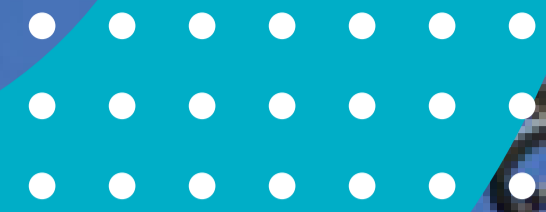

A CHALLENGING ENVIRONMENT WITH MULTIPLE SOURCES OF POLLUTION

Most of Italy's transmission lines are exposed to the rigors of salt air, dry weather, and industrial pollution. In an effort to reduce maintenance, the local TSO looked into all technologies for a robust, low-maintenance solution.

SEDIVER

SEDIVER

SEEDIVER

OUR SOLUTION

More than 1.5 million SEDICOAT Sediver silicone-coated glass insulators have been installed since 2005 in particularly polluted areas. The customer is pleased to report zero pollution-related flashovers and no washing.

Live line work can also be carried out safely, another priority for this satisfied Sediver customer.
