

SEDIVER

Company overview

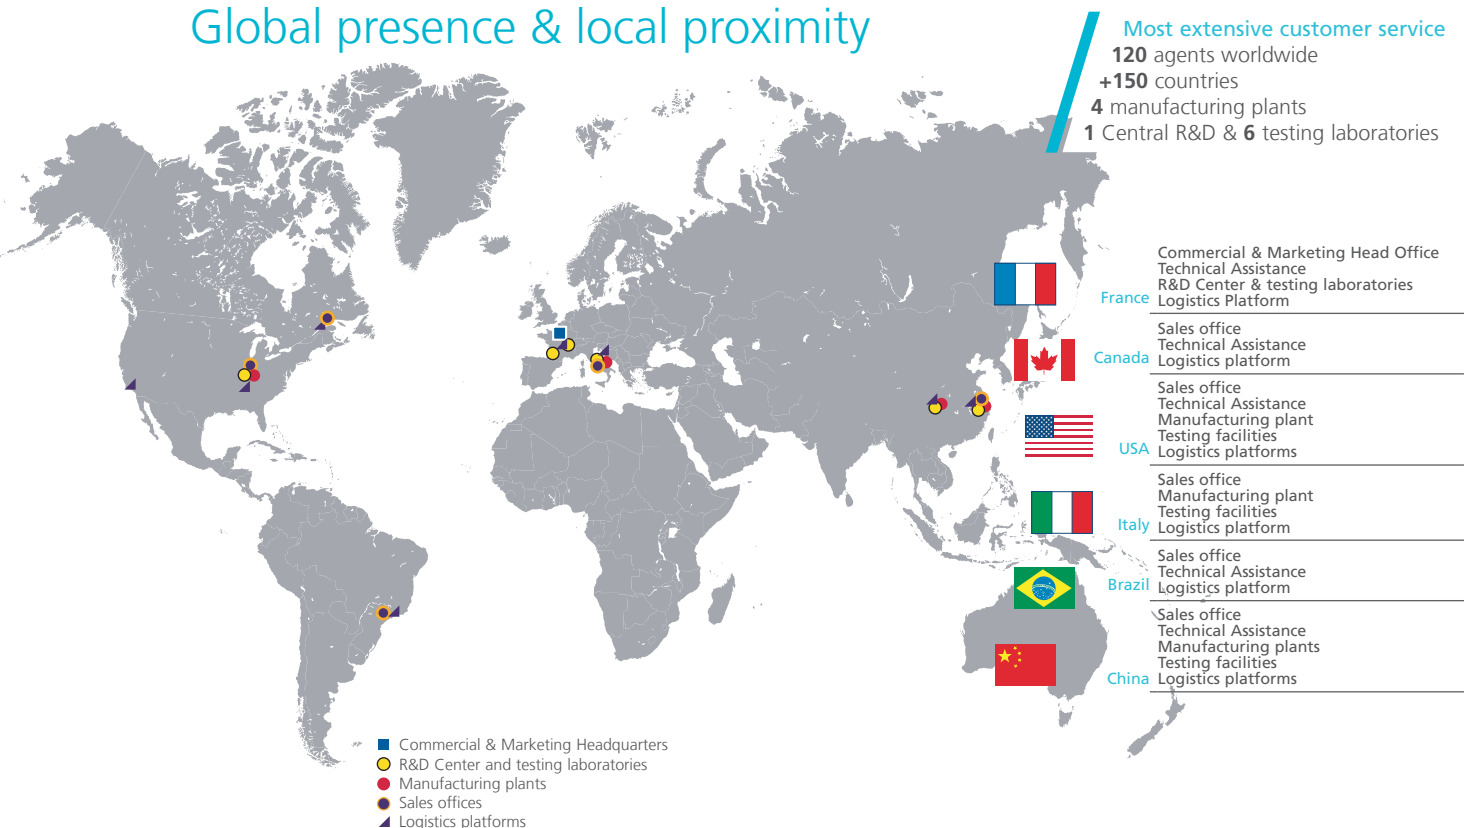

Experts & Pioneers

The world leader in transmission insulation technology

With 70 years of experience on worldwide power networks along with permanent investment in R&D, Sediver has gained a truth expertise in research, design, manufacturing and testing of insulators up to very high voltages as well as for railway catenary systems. Sediver is your natural partner for all insulation applications.

Sediver ensures **the highest reliability and performance** of transmission systems throughout the service time of the line, and under all environmental conditions.

Global presence & local proximity

Research & Development, a continuous investment

Always on the lookout for the **latest advances and continuous technological improvements**, Sediver heavily invests in Research & Development and has pioneered some of the major innovations of the industry, with 600 patents to its name.

The Sediver Research Center located in Saint-Yorre, France boasts state-of-the-art equipment that allows our multidisciplinary world-class experts to perform **extensive research programs** as well as test complete strings for systems up to 800 kV.

Through its unique technical expertise gained from 70 years of R&D combined with its extensive field experience of millions of insulators in service, Sediver is **constantly increasing the reliability of its products**.

Sediver is the essential partner for innovation, through its proficiency in **developing and providing top quality innovative solutions**.

Our complete technical solution

Sediver toughened glass insulation technology

Built on the **highest quality requirements**, our exclusive technology benefits from the latest technological advances and relies on our extensive engineering know-how, distinctive manufacturing processes and technology, in-house designed equipment, and stringent quality systems and production controls that ensure purity of the highest order in our glass, and the best electrical and mechanical performance of our insulators, thus resulting in **superior operating performance and lower life cycle costs**.

HVAC

Broad range of products from Medium up to Ultra High Voltage (UHV)

- 70+ years of global experience
- 550 million insulators up to 1,000 kV
- From 70 kN up to 840 kN

HVDC

Sediver High Resistivity Toughened Glass insulators (HRTG)

- 50+ years of global experience
- 9.5 million insulators
- Up to 800 kV

Extreme pollution

**Sedicoat® insulators
RTV Silicone coated glass insulators**

- 20+ years of proven performance
- 2.8 million insulators
- Up to 500 kV HVAC

World-class consultancy & trainings

Sediver's team of experts provides world-class consultancy that covers every stage of the line insulation process: selecting the best solutions, optimizing insulator string configuration, and providing accurate diagnostic of lines in service to help make informed decisions and anticipate actions. All these stages contribute to improving the performance of transmission systems.

Sediver offers **extensive training programs** tailored to the needs of industry professionals in maintenance fields. Our specialist courses provided by our technical experts cover applications in real-life situations.

Trusted for decades

150 countries | Utilities served by Sediver
